

Tennessee Crop Weather

Tennessee Field Office • PO Box 40627 • Nashville, TN 37204 • (615) 781-5300 or (615) 891-0903 • www.nass.usda.gov

Issued Monday, July 12, 3:00 PM

For the Week Ending July 11, 2021

CROPS MOSTLY IN BETTER CONDITION AFTER RAINS

In West Tennessee, recent rains greatly improved cropped conditions. All row crops have benefitted, and conditions are greatly improved. The rainfall was very beneficial to corn in the reproductive stage of development. Tomatoes were in good condition, with warmer weather needed to ripen the fruit. Other activities were spraying for pests. In Middle Tennessee, rains helped all crops in development stages. Thunderstorms in East Tennessee brought much needed rains and are more are needed for crop development. There were 5.1 days suitable for fieldwork last week. There were 5.0 days suitable for field work last week. Topsoil moisture was 1 percent very short, 13 percent short, 82 percent adequate and 4 percent surplus. Subsoil moisture was 1 percent very short, 14 percent short, 83 percent adequate and 2 percent surplus.

CROP PROGRESS					CONDITION					
Crop	This Week	Last Week	2020	5 Year Avg.	Item	Very Poor	Poor	Fair	Good	Excellent
	Percent					Percent
